

Sherwood Laboratories

A Schools Photographic
Processing Lab

■ Why use Sherwood Labs?

Since starting out in 1983, Sherwood Laboratories have been well known throughout the industry for their exceptional service and turnaround times.

■ Product Range

Please feel free to come and meet the team at our lab. There is not a lot we cannot do, because everything is tailored to you!

■ Bespoke Service

At Sherwood Labs, we endeavour to be on the cutting edge of technology. Every customer receives a tailor-made package totally bespoke to their business, this includes all proof card artwork, unique packages, and all online ordering.

■ Data Protection

Keeping your data secure is one of our main priorities, which is why we have invested in our own secure, in-house server. We do not use any cloud-based storage and have installed our own FTP software, keeping us up to date with GDPR regulations.

■ Price

Sherwood Labs will endeavour to match or better any other lab prices in the UK. To top it all off, we will then hold them for a guaranteed 2 years.

Sherwood's Vision

With the ever changing technologies within our industry, we endeavour to provide you with a service that is second to none. We are currently investing and developing specific software for the school photography industry, which will allow you to be more bespoke than ever. Looking into the future, we hope to implement our new technologies into your business, which will enable you to push ahead of any other competition.

Due to our advanced online software, our online service is now becoming more and more popular with parents. This means we can build you a 100% bespoke online ordering system for your clients. This will allow you to not only sell, but promote your business further.

The schools photographic industry is rapidly changing and advances in digital technology are sometimes difficult to keep up with, especially for the smaller customers. Therefore, we spend as much time developing our relationships and support as we do our technologies. At Sherwood labs, the customer always comes first.
